Petnica natural still water

Vujic Water

Petnica natural still water

Factory for bottling natural still **VUJIC WATER** is member of **VUJIC VALJEVO Ltd.** group. In March 2003 year the factory for bottling was started with work, in place Petnica, 8 km from Valjevo, in colorful nature surrounds, without industrial installations.

Products

Pure untouched nature, without pollution in combination with modern equipment is a winning combination. **VUJIC WATER** in their palette of products offers a 0,5l and 1,5l bottle of natural still water, which customers can buy on domestic and EU market.

Factory for bottling is a modern fully equipped object that satisfied all significant world standards, with line for PET bottle production (SIPA) and with line for bottling with capacity of 13000 bottles per hour (MELEGARI). Total capacity is over 80 millions bottles per year.

Modern laboratory in factory area provides a permanent control of microbiological and physics/chemistry characteristics of water. The controlling is in 9-minute intervals during the production. In addition of internal control there are an external control from laboratory of Republic institute for health protection „dr Milan Jovanović Batut“, from Serbia capitol Belgrade.
